

## Song 1: The Temperature is Rising

Doctor 1: Fever...

Everyone: FEVER!  
FEVER!  
FEVER!

Doctor 1: FEVER!

Everyone: Fever, fever, this day is getting hotter.  
We've got to find the cause now there's so much to do, no  
time to pause now.

Fever, fever, this boy is in hot water!  
So everyone get set, make haste now, there's no time at all  
to waste now, go!

Doctor 1: His temperature is soaring, roaring – feel that fever burn.  
His vital signs are slipping – blood pressure slowly dipping,  
pulse rate skipping, life is dripping out.

The Medics: And now he's sinking deeper, deeper he may not return  
His future's looking grimmer, dimmer, hope but a glimmer.

Everyone: FEVER!  
FEVER!

Good Bacteria: – let's set the temperature higher.

The Press: Hey, something's cooking. What's the low-down?  
Let's get looking for that showdown.

Everyone: FEVER!  
FEVER!

(Cont.)

Bad Bacteria:

– we'll set this boy on fire.  
And there will be no cure.

The Medics:

And now he's sinking deeper, deeper he may not return  
His future's looking grimmer, all hope is getting slimmer,  
Getting dimmer,  
Just a glimmer now.  
So wipe the fevered brow.

Doctor 1:

One thing's sure: we need a cure, but how?

Everyone:

Fever, fever, fever the temperature is rising.  
Fever, fever, fever the heat is terrorising.  
FEVER!
