Know Your Notes

Musicians have a special superpower. They can read a special language made up of lots of dots and lines we call **musical notes**.

Know Your Notes

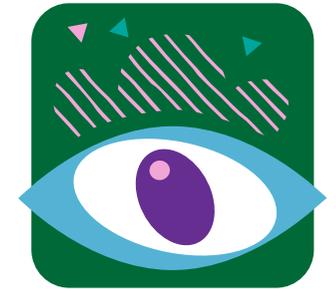

Know Your Notes

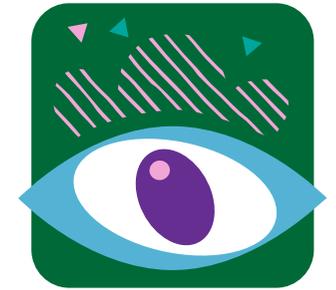

whole note

Know Your Notes

minim

Know Your Notes

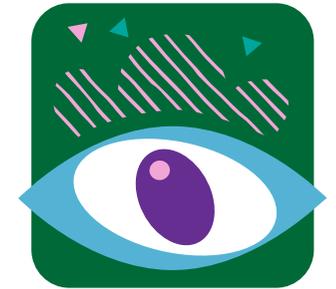

Know Your Notes

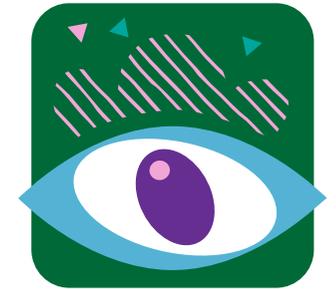

crotchet

Know Your Notes

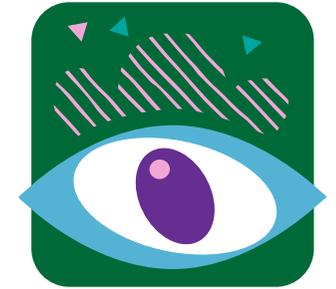

Know Your Notes

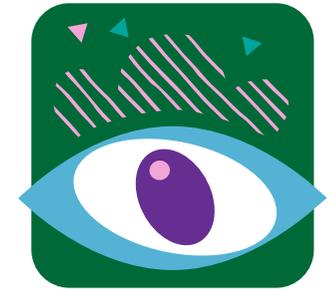

quaver

Know Your Notes

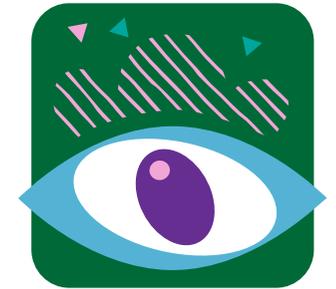

Know Your Notes

double quaver

Know Your Notes

Here are all of the musical notes again.

Can you spot a **whole note**?

Can you spot a **crotchet**?

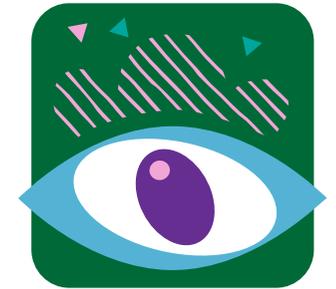

Can you spot a **double quaver**?

Can you spot a **minim**?

Can you spot a **quaver**?

Know Your Notes

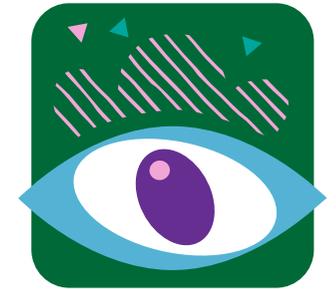

What do you notice is the same with each note?

What do you notice is different?

Know Your Notes

Here are all of the musical notes again. This time they are on lines called a **stave**.

Why do you think the notes are on different places on the stave?

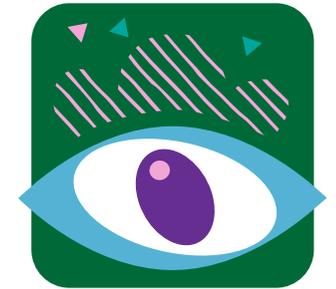

Can you spot a...

whole note **minim** **crotchet** **quaver** **double quaver**?

Can you point to the **lowest note**? And the **highest note**?

Know Your Notes

Here are some more bars of music. Which types of notes can you name?

Do you notice any other lines? The vertical lines that separate the notes are called **bar lines**.

Supported by **Scottish Opera's Education Angels**

With thanks to the **Educational Institute of Scotland** for a donation towards the cost of *The Brassketeers*
