

'Break Free'

Lyrics

The Covid Composers Songbook

Breath Cycle II

'Break Free'

We've been struggling
Somethings in the air
But we'll come out on top
We'll keep pushing and fighting
'Til this pandemic stops

It's been tough, we've been through a lot
Stuck in the house on a daily
Looking back to the times that we'd seen many faces
I guess we just hope that we go back to basics
Back to a place where you feel like your home
Friends and family always around
So if you had thoughts bringing you down
There was someone to pick you up of the ground
Rise up, break free
We'll find a way to make it through just wait and see
Come together, united we stand
You might knock us down
But we'll rise again

We've been struggling
Somethings in the air
But we'll come out on top
We'll keep pushing and fighting
'Til this pandemic stops

Been a long road but we're still here
Through the pain and struggle we shed no tear
We've adapted, we evolved, we've grown
Through the toughest times we've shown
That we're strong, that we're resilient
Won't stop till we see the end
We'll keep pushing, keep striving
'Til COVID is nothing but a distant memory

We've been struggling
Somethings in the air
But we'll come out on top
We'll keep pushing and fighting
'Til this pandemic stops
